

## Attention: MFHT Patients

1. Are you experiencing any new COVID-19 symptoms within the last 7 days?

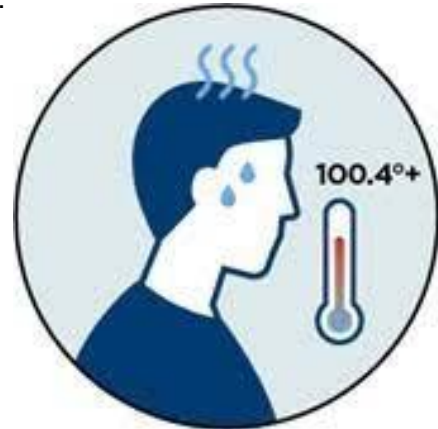

2. Are you considered “high risk”?

- Immunocompromised
- Unvaccinated and over 60
- Unvaccinated and over 50 with Risk Factors (obesity (BMI  $\geq 30$ ), kidney disease, diabetes, cerebral palsy, intellectual disability or sickle cell disease)
- Unvaccinated, age 50 or older, indigenous (Inuit, Metis or First Nations)

If you answered **YES** to questions 1 and 2, please book an **URGENT** appointment with our office or the Markham Stouffville Hospital Clinical Assessment Centre as there are **NEW**

treatment options available to you.

If you only answered **YES** to question 1, please contact our office for a non-urgent assessment as you may qualify for our COVID-at-home program.

**Markham Family Health Team**  
*Care for A Lifetime*
